# WHAT IS FOREX?

\$7.5 Trillion

24 Hours  
Market

Largest Financial  
Market in the World

## Forex Trading

Forex Trading is the market place for trading all the world's currencies and is the largest financial market in the world. There are many benefits of trading forex, which include convenient market hours, high liquidity and the ability to trade on margin. It has \$7.5 trillion trading volume per day.

## Advantage

Leverage can make your money go further and you can trade a wide range of currency pairs. Forex operates 24 hours a day, five days a week, providing flexibility for traders to engage in trading activities at almost any time, regardless of their location with user-friendly platforms that execute trades on the go.

# WHAT IS CRYPTO?

BITCOIN

LITECOIN

BITCOIN CASH

TETHER

ETHEREUM

RIPPLE

**WORLDWIDE  
NETWORK**

**CHEAPER  
TRANSACTION  
COST**

**HIGH PROFIT  
POTENTIAL**

## Cryptocurrency

Any form of currency that exists digitally or virtually and uses cryptography to secure transactions. Cryptos don't have a central issuing or regulating authority, instead using a decentralized system to record transactions and issue new units. The market is usually available to trade 24 hours a day, seven days a week because there is no centralised governance of the market. Crypto transactions can have lower fees and faster transfer times than some traditional bank transactions.

## Advantage

**Inflation Protection.** Due to inflation, the value of many currencies decline. Many folks see cryptocurrency as offering protection against inflation. Crypto transactions are done in a matter of minutes with its transactional speed that can be transferred globally. It is safe and secure. The transactions are secured by the blockchain system along with the scattered network of computers that verify the transactions

Trading offers potential opportunities for profit, however, it is essential to approach it with a realistic mindset. 99% of traders lose their money while trading specially for beginners, that's why it is essential to approach the market with a well-regulated & reliable broker offering a variety of trading accounts and platforms for continuous income.

**INDEX TRADING**

**BOT TRADING**

**FOREX TRADING**

**FOREX ARBITRAGING**

# INDEX TRADING

A stock index is a specimen or collection of stocks that gives an impression of how a specific part of the stock market is performing. Example, a technology stock index will track technology stocks. The index moves with the overall presentation of the stocks that it holds within it. The index can be used by investors who want to rapidly meter the recital of technology stocks, either at that moment or over time.

## Why Trade CFDs On Indices with ArbitFx?
